The goal is to score the required baskets in each level to complete the level and move on to the next levels by getting baskets in hoops. You can move the ball with your fingers, putting your finger on the basketball and moving in the direction you want. The power is based on the speed of the film. Basketball is placed on the screen and it is necessary to move the ball and score the necessary baskets before the waiting time is reached. Finger Basketball is the basis of hoop games on Android. Finger Basketball is a completely free basketball to entertain from children to adults. A big fan of basketball and hoops? This is your game. Basketball is the best way to win the levels. Play your favorite basketball game with your fingers. Shoot the hoops and win the levels. As levels increase, difficulty levels increase becoming professional. Don't worry about basketball stats, which are right on the screen in easy-to-read mode as you focus on the game. Do you want to be a professional basketball player? This is the game for you. Best basketball shooting game. I really think this is a good game with a good concept. The gameplay is also nice, but the quality look needs some improvements. The game could probably have some better images and better graphics with a little work. The game could be a little smoother with a little animation for the menus to give you that good feeling. You might also have some unique things that other games don't have when it comes to this concept as a different feature. With that, I hope this review has helped as a criticism.
